Corps of Engineers Awards Indoor Air Quality Upgrade Contract

HUNTSVILLE, Ala. – The United States Army Corps of Engineers Huntsville Engineering and Support Center awarded a task order contract award valued at up to \$800,000 to Johnson Controls of Milwaukee, Wis., to furnish and install an energy monitoring and control system for indoor air

quality upgrades for the entire Pentagon.

The work, conducted for the Pentagon Renovation and Construction Program Office, includes design and testing for heating, ventilation and air conditioning systems, sequences of operations and equipment additions to insure adequate air quality, carbon dioxide monitoring and reporting, as well as applying software modifications to all energy monitoring and control systems to ensure proper air

quality for all spaces in the building.

The U.S. Army Engineering and Support Center, Huntsville, supports very specialized missions that require unique technical expertise in programs that are generally national or very broad in scope. The Center supports tasks that require a centralized management structure, integrated facilities or systems that cross geographic division boundaries; and tasks that require commonality, standardization,

multiple-site adaption or technology transfers.

For more information, please contact Huntsville Center's Public Affairs Office, 256-895-1691 or 256-895-1693.
